3. I advised Jim Garrison that he could plan on purchasing about \$750,000 worth of unitized furniture during Fiscal Year 1960 but that I would give him a final figure later in the Fiscal Year.

5. [REDACTED] were over to brief me on the automation system which they propose for the Photographic Intelligence Center. I was most favorably impressed with [REDACTED] and his knowledge of what they wanted and needed. However, I am not sure that they haven't some early prejudices against certain types of equipment such as that being planned for [REDACTED] which might be adapted to their use. In any case, we have a systems study being made and no final action will be taken until the matter is thoroughly reviewed.

6. I alerted Matt Baird to the fact that [REDACTED] was coming over to talk to him about a job. I also learned that Matt was interviewing [REDACTED] for a job and told him that I frowned upon this and that he should not make any deal with [REDACTED] without my approval.
